

HFMA REGION 2 **FREE WEBINAR**

APR DRGs: Understand Your Hospital Opportunity as Identified from Best Practices Statewide

Tuesday, February 1, 2011 1:00 PM - 2:00 PM EST

Webinar Registration

Join Provider Consulting Solutions (PCS) for an insightful discussion on best practices related to the introduction of APR DRGs.

Medicaid Reform and the recalibration of APR DRG weights has introduced an across the board sweeping decline in the New York State Hospital Medicaid CMI. Furthermore, the introduction of the APR DRG methodology necessitates a re-examination of the facility's priorities relative to CDI (Clinical Documentation Initiative).

As part of its ongoing APR education initiative, PCS has developed a methodology for ranking APR DRG opportunity by service area. Using statewide Medicaid FFS data grouped under APR DRGs, PCS has developed best practices which, when applied to the individual hospital, highlight areas of opportunity for every hospital.

Participants will receive a hospital-specific profile identifying and quantifying potential opportunity based on these best practices as applied to their SPARCS 2008 de-identified data.
